### Empathy Map Canvas

An empathy map canvas in the context of our restaurant recommendation system project serves as a valuable tool to understand the perspectives and experiences of our users. This canvas allows us to visually organize and analyze the thoughts, feelings, needs, and actions of our target audience when seeking restaurant recommendations. By creating this empathy map, we gain deeper insights into what influences their dining choices, enabling us to tailor our recommendation system to better meet their preferences and provide a personalized and satisfying dining experience.
